

Oct. 25, 2012

To Honorable Shelley C. Chapman: I am
74 year old widow I have a blood
clotting disorder that requires me to have
lab work done several times monthly
I take a blood thinner on a daily basis
I also take medication for gout which
causes pain and swelling in my feet. I
also take medication for high pressure,
cholesterol and gastroesophageal reflux disorder
-They have tried to take me off of blood
thinners several times but each time I
developed blood clots. I will never be able
to go off of my blood thinner regimen per
my doctor. It is very important and detrimental
to my health that my insurance coverage
not be interrupted or altered.

Sincerely,
Marjorie E. Carnes
