

To Whom ever this concerns

I am a retired Coal miner who started in the mines in 1976. I am 73 years old with heart problems. I have had 2 open heart operations plus a Valve replacement. I worked at Arch minerals under contract to receive my pension and my medical insurance. at the time there was no Patriot Coal Co. Why are we held responsible for a Company that was created the last few years? I live on my social sec. Check and on my Pension and I cannot pay for any medical bills on what I receive. my medicines are close to \$1,000.00 a month. I also have to wear two hearing aids as I lost over 60% of my hearing due to my working in the mine. Due to my heart issues my Doctor calls my case Critical! Now the Company is trying to take away what we worked so hard to get. I am pleading to you this day to help us keep our medical insurance and our Pension as it is all we have!! The miners including myself gave of ourselves to get our pension and our medical insurance when we retired now the Coal Companies are trying to take it away from us. I beg of you to fight for us to keep what we worked for.

Thank you,
