To the Honorable Kathy A Lunnatt - States

I worked in the coal mines for 36 years for only Peabody Coal Co. Never did I work for Patriot Coal. I am 68 yrs old and most of us retirees planned our retirement on SS + Coal mine Pension + life time health care. Taking either one or both of them away from us will just about put most of us out of our homes and even worse it will be like signing our death warrent. It really don't seem right that a big company can set another one up to fail like they did with Patriot just to take away what we worked for all our lives just so they can be richer. They give their executives big million dollar bonuses and ruin our lives when we coal miners made the big company rich. Most of us retirees will not be able to buy our medications and some of us have so much wrong with us we won't be able to afford insurance even if we can get it.

Thank for your time.
